CAREER OBJECTIVE

An enthusiastic MCA first-year student with a keen interest in applying theoretical knowledge to practical challenges, demonstrating initiative and adaptability in every learning environment. Experienced in working on multiple college projects using technologies such as Django, PHP, Laravel and .Net with the ability to effectively handle databases like SQL and MongoDB. I enjoy working on projects that challenge me to think creatively and develop innovative solutions. Enthusiastic about learning emerging tools, developing innovative software solutions, and contributing effectively in collaborative team environments while building a career in the IT industry. I have also successfully completed the AWS Course Certification from AWS Academy, which provided me with comprehensive knowledge and practical skills in cloud computing.
